Great for the image of
the Metropolitan Area!

Good for the city,
good for the county and
good for the state!

Inside the GRAM is/was not
the best location.

At Pearl St. & Monroe Ave. is
the best location for foot and
vehicle traffic. Highly visible!

This structure should be built here for the best visibility and access from all sides.
The Visitor's Center should be a stand alone structure dedicated to daily information.

Additional assistance will come from the city of Grand Rapids,
Kent County, the state of Michigan and corporate sponsors for
naming rights.

Suggested

The "BMA" Information Center (Bissell, Meijer, Amway)

This information center, at this location, will greatly
assist in securing more convention activities in our
facilities and could only help in a decision for a
company to re-locate their operations here.
